

BlihOps V1 – Product Brief

1. Overview

BlihOps is an outsourcing platform that connects global companies with pre-vetted Ethiopian software engineers. The first version focuses on validating the business by generating leads, managing operations internally, and providing approved clients with access to a curated talent pool.

This version intentionally excludes the future **Skills** and **Talent Marketplace** products, which will be developed in Version 2.

2. Goals

Business Goals

- Generate qualified company leads.
- Build and maintain a vetted talent pool.
- Reduce the time required to match clients with engineers.
- Deliver a professional client experience during the pilot process.

Product Goals

- Manage all leads from one admin portal.
 - Recruit and validate engineers before clients need them.
 - Provide approved companies with a private workspace to explore available talent.
 - Keep internal operations simple and scalable.
-

3. Products

3.1 BlihOps Web

Purpose

Public-facing website for marketing, lead generation, talent applications, and client access.

Features

- Marketing pages
- Services
- About
- Contact

- Request Pilot
 - Book a Call (Calendly)
 - Join Talent Pool
 - Client Workspace (Protected)
-

3.2 BlihOps Admin

Purpose

Internal platform used by the BlihOps team to manage operations.

Features

- Dashboard
 - Lead Management
 - Pilot Requests
 - Contact Requests
 - Booked Calls
 - Talent Applications
 - Talent Pool
 - Company Management
 - Rate Cards
 - CMS
 - User Management
-

3.3 BlihOps API

Purpose

Backend powering both the public website and the admin platform.

Responsibilities include:

- Authentication
 - Lead Management
 - Talent Management
 - Company Management
 - Client Workspace
 - CMS
 - Email & Invitations
-

4. User Types

Visitor

Public website visitor.

Can:

- Browse website
 - Contact BlihOps
 - Request a pilot
 - Book a call
 - Apply to the talent pool
-

Client

Approved company invited by BlihOps.

Can:

- Access Client Workspace
 - Browse available talent

6. Client Flow

7. Client Workspace (V1)

Purpose:

Provide approved companies with a secure, private portal to explore available engineers.

Features

- Dashboard
 - Available Talent
 - Talent Profiles
 - Rate Cards
 - Saved Candidates
 - Interview Requests
 - Pilot Status
-

8. Talent Pool

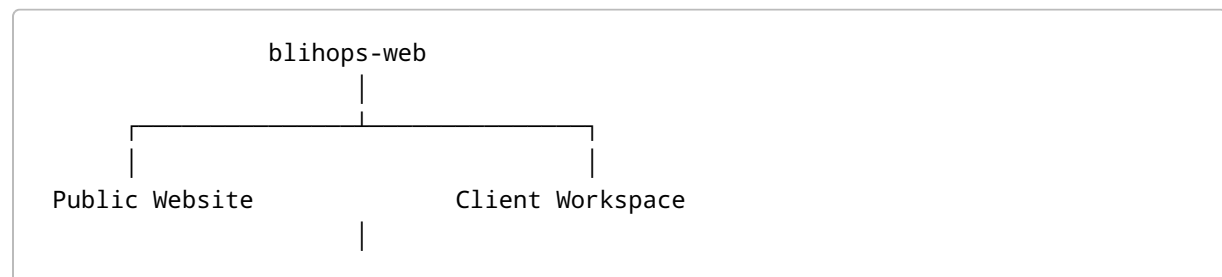

The Talent Pool is an internal database of approved engineers.

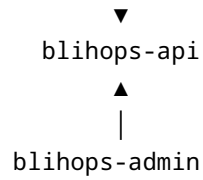

Each profile includes:

- Profile Photo
- Name
- Role
- Seniority
- Tech Stack
- Years of Experience
- English Level
- Availability
- Portfolio
- Resume
- Hourly Rate
- Monthly Rate
- Status

Only approved talents are visible to clients.

9. Architecture

10. Out of Scope (Version 1)

The following products are intentionally postponed:

- BlihOps Skills
- BlihOps Talent Marketplace
- Public talent marketplace
- Self-service company registration
- Self-managed talent profiles
- AI talent matching
- Payments & invoicing
- Messaging system

These will be considered for Version 2 after validating the core outsourcing workflow.
