

BlihOps V1 – Product Requirements Document (PRD)

1. Product Overview

Purpose

BlihOps is an outsourcing platform that connects global companies with pre-vetted Ethiopian software engineers.

Version 1 focuses on validating the business by:

- Generating qualified company leads.
- Building and maintaining a vetted talent pool.
- Providing approved clients with a private workspace to explore available talent.
- Managing all operations through an internal admin portal.

Version 1 intentionally excludes the future Skills platform and Talent Marketplace.

2. Product Goals

Business Goals

- Generate qualified leads.
- Build a high-quality talent pool.
- Reduce time-to-match for clients.
- Deliver an excellent pilot experience.

Product Goals

- Centralize operations.
 - Recruit and validate talent.
 - Provide a secure client workspace.
 - Keep the platform simple and scalable.
-

3. Products

3.1 BlihOps Web

Purpose:

Public-facing website for marketing, lead generation, talent applications, and client access.

Features

- Marketing Pages
 - Contact Form
 - Pilot Request
 - Book a Call (Calendly)
 - Join Talent Pool

Each activity records:

- Timestamp
- User / System
- Action
- Target Entity

12. Business Rules

Authentication

- Single authentication system.
- Role-based authorization.
- No public registration.

Leads

- Every Contact, Pilot Request, and Calendly booking creates a Lead.
- Leads never automatically become Clients.
- Client creation is manual.
- Leads can be archived.

Companies

- Every Client has one Workspace.
- Workspace is created when the Client is created.
- Invitations are sent manually.
- Archived Clients lose Workspace access.

Talent Applications

- Every submission creates one Talent Application.

- Applications can be rejected at any stage.
 - Only approved applications can request profile completion.
-

Talent Profiles

- One Talent Profile per approved application.
 - Clients only see Visible profiles.
 - Clients never contact talents directly.
-

Client Workspace

- Accessible only by invited Clients.
 - Clients only access their own Workspace.
 - Interview requests are managed through BlihOps.
-

13. Assumptions & Future Considerations

Current assumptions for Version 1:

- One seeded admin account.
 - One client user per company.
 - One workspace per client.
 - Recruitment communication handled manually.
 - Interview scheduling outside the platform.
 - Calendly used for scheduling.
 - Talent Profiles managed only by admins.
-

14. Out of Scope (Version 1)

Products

- BlihOps Skills
 - BlihOps Talent Marketplace
-

Authentication

- Public Registration
- Multi-Factor Authentication

- Internal User Management
 - Multiple Client Users
-

Recruitment

- Self-managed Talent Profiles
 - AI Matching
 - Public Talent Marketplace
-

Client Features

- Messaging
 - Contracts
 - Payments
 - Invoicing
 - Team Management
 - Analytics
-

Admin Features

- Advanced Reporting
 - Role-based Admin Permissions
 - Workflow Automation
-
