

# BlihOps V2 PRD Extension

## 4. User Roles

### Talent

Approved software engineer invited by BlihOps.

Can:

- Access the Talent Portal.
- View and update their professional profile.
- Update portfolio links.
- Update resume.
- Update skills and experience.
- Update availability.
- Update professional information permitted by BlihOps.

Business Rules

- Only approved talents receive Talent Portal access.
  - Talents can only access their own profile.
  - Talents cannot edit internal assessment data.
  - Talents cannot edit approval status or visibility settings.
  - All profile changes are immediately reflected in the Talent Profile unless otherwise configured by the admin.
- 

## 7. Talent Portal

### Purpose

Provide approved talents with a secure self-service portal to maintain and improve their professional profile.

### Dashboard

Displays

- Profile Completion
- Profile Status
- Availability
- Recent Updates

## Profile Management

Talents can update:

- Profile Photo
- Professional Headline
- Short Bio
- Primary Role
- Tech Stack
- Secondary Skills
- Years of Experience
- Portfolio
- GitHub
- LinkedIn
- Resume
- Availability
- Earliest Start Date
- Preferred Engagement

## Functional Requirements

Talent can:

- View Profile
- Edit Profile
- Upload Resume
- Upload Profile Photo
- Update Portfolio Links
- Update Availability

## Business Rules

- Talents can only modify their own profile.
  - Internal assessment information is read-only.
  - Profile ownership belongs to the talent while verification remains under BlihOps.
  - Authentication is required for all Talent Portal access.
- 

# 8. Client Workspace

## Team Management

### Purpose

Allow clients to organize hired engineers into project teams.

## Team List

Displays

- Team Name
- Number of Members
- Pod Lead
- Created Date

## Team Details

Displays

- Team Name
- Pod Lead
- Team Members

## Functional Requirements

Client can:

- Create Team
- Rename Team
- Delete Team
- Add Hired Talent
- Remove Hired Talent
- Move Talent Between Teams
- Assign Pod Lead
- Remove Pod Lead

## Business Rules

- Teams exist only within the client's workspace.
- A client can create multiple teams.
- Team names are unique within a workspace.
- Pod Lead assignment is optional.
- Only hired talents can be assigned to teams.
- Team management does not affect the hiring workflow.
- Hiring and interview coordination continue to be managed manually by BlihOps.

---

# 12. Business Rules

## Talent Portal

- Only approved talents receive portal access.
- Every talent has one Talent Portal account.

- Talents may update only editable profile fields.
- Internal verification fields remain editable only by admins.

## **Team Management**

- Teams belong to a single client workspace.
  - Teams are used to organize hired engineers.
  - Teams do not represent recruitment status.
  - Pod Lead assignment is optional.
  - Engineers may be reassigned between teams by the client.
- 

# **13. Assumptions & Future Considerations**

Current assumptions for Version 2:

- One Talent account per approved Talent Profile.
- One Client Workspace per company.
- Clients organize hired engineers using Teams.
- Hiring and recruitment continue to be managed manually by BlihOps.
- Team management is organizational only and does not replace recruitment workflows.
